Summary

 I'm an enthusiastic second-year student at CNAM University, eager to secure a fulfilling full-time position while pursuing my studies. My foundation in web development equips me with the skills to contribute effectively. Through collaborative projects, I've honed my leadership and communication skills. I embrace new programming languages with a quick learning curve to align with company needs. Dedicated to delivering quality results, I'm committed to excelling in both academic and professional endeavors.

Projects

1. **Coursero:** This innovative platform offers teachers a unique avenue to showcase their skills, whether by offering private lessons tailored to individual needs or by marketing and selling their comprehensive courses. With Coursero, educators can effortlessly connect with students who are eager to learn, providing a space for personalized education and expansive knowledge-sharing.

Features:

- Chat between users.
- Courses creation and subscription
- Posts creation
- Fully responsive

Use:

- HTML, CSS, JavaScript, PHP, MYSQL and Ajax

Source Code: https://github.com/ahmad-hawchar/coursero-project

2. **Bi3ni:** At Bi3ni, people have the opportunity to sell their items, from second-hand used items to new things, turning their passion into thriving businesses.

Features:

- Chat between users.
- Listing items by post
- User Login/Register
- Delete/Edit Post
- Full admin control

Use:

- HTML, Tailwind, JavaScript, Django (Python), and Ajax

Source code: https://github.com/ChadiEch/bi3ni
