AI & Automation: Cursor, GitHub Copilot, AI-assisted coding workflows

Backend & Databases: Nest.js, Express.js, Django, PHP, MongoDB, MySQL, Prisma

Optimization & CRO: A/B Testing, Speed Optimization, Responsive Design

Versioning & Design: Git, Figma, Docker

Tools & Environment: Cursor, GitHub, Shopify Admin & Theme Editor, Figma, Chrome DevTools, Slack, Intelligems, Convert.com, Docker

Other Tools: WordPress, Photoshop, Excel, PowerPoint

Work Experience

DJANGO TRAINING WORKSHOP (4 Months)

NEWWAYS

Tripoli-Lebanon, 04/23 - 08/23

- Created a management system for a dental clinic in collaboration with **a team of more than 10 people**.
- Learned **Django and Linux** during a training program that lasted 4 months.
- Learned **Git And GITHUB** while **fixing conflicts** of other teammates working on the same project.
- Learned Hosting applications in Linux Based server with **dockerization** for unique environment for each project.
- Teamwork and leading a small team.

IT AND NETWORKING (+1 year)

MFS

Tripoli-Lebanon, 09/23 – 12/24

- Managing and servicing a network of **more than 200 people** connected to our internet service.
- Solving and fixing **software and Hardware** computers problems.
- Installing and modifying operating systems.
- Upgrading / maintaining devices for a gaming lounge and a library.
- **Assigning tasks** for employees and **guiding** them in their work.

Project Manager and Developer

Winnerforce

Tripoli-Lebanon, 01/25 –Till Now

- **Developed and optimized Shopify store layouts and cold traffic funnels**, improving user flow and conversion rates.
- **Implemented custom Liquid templates and Shopify sections** aligned with CRO strategies.
- **Used AI coding tools (Cursor, GitHub Copilot)** daily to streamline development and generate clean, scalable code.
- Collaborated with marketing teams to **deploy A/B tests** and improve site performance metrics.
- Leading a team of 2 internship students for customizing new features on the store like GetTheLook, 3d view, etc...
- *Contributing with tech companies that we work with on mobile app Erp etc. ...*
- Finding software solution and working on several custom platform to help and improve the company work like ambassador management platform, task management platform, E-catalogue, Social Media management platform.
- Managing catalogue for meta.

Shopify Stores

Unlisted LB

Luxury streetwear Shopify store with custom theme enhancements and an optimized checkout flow.

- Built and customized Shopify theme sections using **Liquid, JavaScript, and Tailwind CSS**.
- Improved **checkout conversion rate** through layout changes and A/B testing of call-to-action placements.
- Integrated **custom product display logic** and collection filters for faster browsing.
- Optimized **page load speed** and Core Web Vitals for mobile and desktop.
- Used **AI coding tools (Cursor, GitHub Copilot)** to streamline repetitive coding tasks and improve workflow.

Daring Eyes

High-performance Shopify store for eyewear and accessories.

- Designed and implemented **responsive product pages** using Shopify Liquid and CSS3.
- Integrated **conversion-oriented design principles** for cold traffic funnels.
- Customized variant selectors and cart interactions for smoother user experience.
- Deployed **A/B test variations** for product page layout and CTA positioning.
- Collaborated with the marketing team to align CRO updates with ad traffic performance.

Organsky

Organic skincare eCommerce store built with speed and CRO in mind.

- Refactored and optimized theme code for faster rendering and reduced liquid loops.
- Implemented **AI-assisted code refactoring** using Cursor for cleaner, modular sections.
- Conducted **A/B tests** for homepage banners, product images, and add-to-cart buttons.
- Enhanced SEO structure and meta optimization for improved discoverability.
- Integrated third-party apps (reviews, subscriptions, analytics) seamlessly.

Winnerforce

Sportswear brand where I continuously maintain and customize the Shopify store as part of my ongoing role at Winnerforce.

- Maintain and optimize the **entire Shopify storefront**, ensuring peak performance and conversion rates.
- Implement **custom Liquid blocks and dynamic product sections** for new campaigns and collections.
- Build **multi-step funnel pages** optimized for cold traffic and paid ad conversions.
- Integrate **CRO tools** (Meta Pixel, GA4, Intelligems) and track user behavior for optimization.
- Use **AI-powered tools (Cursor, GitHub Copilot)** to accelerate feature delivery and refactor code.
- Collaborate with designers and marketers to translate **Figma mockups** into high-performing, responsive designs.

- Built complete **cold-traffic funnels**, including landing, upsell/downsell, and thank-you flows.
- Integrated **A/B testing tools (Intelligems, Convert.com)** to evaluate CRO hypotheses.
- Ensured **cross-browser compatibility and speed optimization** post-implementation (under 3 s mobile).
-
- Perform ongoing **speed, SEO, and UX optimizations** to maintain best-in-class performance metrics.

Columbus

Outdoor and adventure brand store managed under Winnerforce's eCommerce umbrella.

- Oversee **continuous customization and maintenance** of the Shopify storefront.
- Implement **data-driven CRO strategies** to improve conversion rates and average order value.
- Create **custom product and collection templates** using Liquid, JavaScript, and CSS.
- Develop responsive landing pages tailored for **cold traffic and mobile-first users**.
- Employ **AI coding tools (Cursor, Copilot)** to streamline theme updates and A/B test variations.
- Conduct ongoing **performance audits and layout testing** for UX consistency and conversion growth.

Custom Web Platforms

Ambassador Management Platform

Full-stack web platform to track ambassador activity, analytics, and performance for Winnerforce.

Tech: NestJS, React, PostgreSQL, Tailwind CSS

- Developed **multi-role authentication system** (Admin, Leader, Ambassador).
- Built dashboards showing **Instagram activity analytics and compliance metrics**.
- Integrated **Instagram Graph API webhooks** for mention and tag tracking.
- Implemented **notes, feedback, and compliance modules** for managers and leaders.
- Focused on performance, scalability, and clean UI/UX using Tailwind CSS and reusable components.

Task Management Platform

Internal productivity tool for team task coordination and progress tracking.

Tech: React, Node.js, MongoDB, Express, Tailwind CSS

- Designed and developed **calendar-based task views** for employees and admins.
- Built **real-time task synchronization** with MongoDB and WebSocket updates.
- Integrated **AI-assisted UI refactoring** using Cursor for faster front-end component generation.
- Focused on clean UX, color-coded priorities, and responsive layouts for desktop and mobile.
- Implemented secure login, task filtering, and role-based management logic.

Personal Projects

Bi3ni (Djnago, tailwindsCSS)

(AUGUST 2023)

- Created and integrated different applications for **several services**

- Created a full design on **Figma** and implemented it and made sure that **all pages are responsive**.
- Made sure that the code is **readable and follow best practices**.

Chat App (React-Express.js-MongoDB-TailwindCSS)

(January 2024)

- Developed the full application using **MERN stack**.
- Developed the Interface using **React and CSS** with integrated backend functionality.
- Used **WebSocket** for real-time changes of the chats and for online-offline users.

Coursero (HTML-JS-PHP-MYSQL-CSS)

(March 2022)

- Developed a full website (front end, back end, database) while working with a team.
- Made separate designs for **3 types of users** (student, teacher, admin) with unique features for each role.
- Assured the **security of user inputs** (sanitizing and testing all inputs, encrypting the passwords).
- Made a full **relational database** using SQL while focusing on dependencies and normalization.

Municipality management system (HTML-JS-PHP-MYSQL-CSS)

(september 2024)

- Developed a **full website** (front end, back end, database) and created/implemented **a Figma design**.
- Made separate designs for **3 types of users** (user, employee, admin) with **unique features** for each role.
- Integrated **global APIs**.

Education

Conservatoire National des arts et métier (CNAM Engineering university)

- Bachelor of Computer Science
